Contents of Vol. 30 (Complete)

Vol. 30, No. 1

A transition occurring in ideal elastic liquids during shear flow
J.J. Magda and R.G. Larson (Murray Hill, NJ, U.S.A.) 1

A constitutive equation for a dilute solution of Hookean dumbbels with approximate hydrodynamic interaction
L.E. Wedgewood (Madison, WI, U.S.A.) 21

Die design by a boundary element method
T. Tran-Cong and N. Phan-Thien (Sydney, NSW, Australia) 37

Numerical simulation studies of the planar entry flow of polymer melts
S.A. White (Madison, WI, U.S.A.) and D.G. Baird (Blacksburg, VA, U.S.A.) 47

Application of interconversions to viscosity measurements of polystyrene
K. Bernreitner, M. Gahleitner and R. Sobczak (Linz, Austria) 73

Short Communication
Some properties and analytical expressions for plane flow of Leonov and Giesekus models
M.A. Hulsen (Delft, The Netherlands) 85

Book review 93

Publisher's note 96

Vol. 30, Nos. 2 + 3

Editorial 97

Elongational flow and rheology of monodisperse polymers in solution
A.J. Müller, J.A. Odell and A. Keller (Bristol, United Kingdom) 99

On the mechanism of stretching and breaking of polymers in elongational flows
Y. Rabin (Rehovot, Israel) 119

Chain scission in transient extensional flow kinetics and molecular weight dependence
T.Q. Nguyen and H.-H. Kausch (Lausanne, Switzerland) 125

The mechanisms of 'neck-like' deformation in high-speed melt spinning.
1. Rheological and dynamic factors
A. Ziabicki (Warsaw, Poland) 141

The mechanisms of 'neck-like' deformation in high-speed melt spinning.
2. Effects of polymer crystallization
A. Ziabicki (Warsaw, Poland) 157

Extensional effects in complex flows
B. Debbaut and M.J. Crochet (Louvain-la-Neuve, Belgium) 169

Load enhancement effects due to polymer thickening in a short model journal bearing
D.R. Oliver (Birmingham, Great Britain) 185

Low Reynolds number flow visualization of linear and branched silicones upstream of orifice dies
J.M. Piau, N. El Kissi and B. Tremblay (Grenoble, France) 197

On the use of flow through a contraction in estimating the extensional viscosity of mobile polymer solutions
D.M. Binding and K. Walters (Aberystwyth, Wales, United Kingdom) 233

Polymer complexation effects in extensional flows
N.E. Hudson, J. Ferguson (Glasgow, Scotland, United Kingdom), and B.C.H. Warren (Salisbury, England) 251

Fiber spinning of very dilute solutions of polyacrylamide in water
R.C. Chan, R.K. Gupta (Amherst, N.Y. U.S.A.), and T. Sridhar (Clayton, Victoria, Australia) ... 267

Fluid detachment and slip in extensional flows
T. Sridhar (Clayton, Victoria, Australia) and R.K. Gupta (Amherst, NY, U.S.A.) 285

Uniaxial and biaxial extensional viscosity measurements of dilute and semi-dilute solutions of rigid rod polymers
C.A. Cathey and G.G. Fuller (Stanford, CA, U.S.A.) 303

The effect of shear in porous medium flow of surfactant solutions
P.O. Brunn and J. Holweg (Erlangen, F.R.G.) 317

An experimental and theoretical study of the effect of the elongational history on the dynamics of isothermal melt spinning
J. Sampers and P.J.R. Leblans (Geleen, The Netherlands) 325

Transient extensional viscosity of dilute flexible polymer solutions
M. Moan and A. Magueur (Brest, France) 343

Stress relaxation of a polymer melt after extensional flow
K. te Nijenhuis and C.L.J.A. Verbraak (Delft, The Netherlands) 355
